FolioPDF user guide

Open and navigate

Use Open, Ctrl+O, or the plus beside your tabs. Switch tabs with Ctrl+Tab or Ctrl+Shift+Tab. Close the current tab with Ctrl+W. Find text with Ctrl+F.

Zoom and read

Use Ctrl+Plus or Ctrl+Minus to zoom and Ctrl+0 for actual size. The toolbar offers Fit width, Fit page, and vertical or horizontal reading. Change pinch and Ctrl+wheel behavior under Reading & gestures.

Appearance

Open Settings, then Appearance. Choose Deep Dark for a black interface, or enable Dark PDF pages to invert the document view. Use a preset accent, a color picker, or enter a six-digit hex color.

Annotate and save

Add text or highlight a selection. Use Save edited copy to write a separate PDF. Use the printer icon to print.

Updates and file association

Use About & updates to check for updates. Save changes before restarting. On Windows, install FolioPDF and select it for .pdf in Default apps. On Linux, choose FolioPDF in the file manager's Open With menu after installing the Debian package.
